

Morteza Dehghani

Programmer

👤 Profile

I am an AI developer with unparalleled perseverance Innovative Programmer and to make the world a more unified and connected place. A creative thinker, adept in software development and working with various data structures.

I am trying to make all those interested in artificial intelligence more familiar with this science, and I will spare no effort in this.

I will repay your trust with my efforts and I will not disappoint you.

💼 Employment History

Writing more than 30 artificial intelligence projects with machine learning, deep learning, and recurrent neural network methods. Familiarity with fast API and streamlit, postgreSQL, sqlite, QT, numpy, pandas, scikit-learn, Docker, TensorFlow, Keras, etc.

🎓 Education

I am a PhD student in artificial intelligence

📚 Courses

machine learning

Python programming with an artificial intelligence approach at three levels (introductory, intermediate and advanced)

Deep learning (at the heart of Transformers)

Data science and data analysis

English Language Course for Adult(1A,1B)

Deploy AI Project With liara, streamlit, Render
